pendingAssignmentIds, isEmployee, user?.employeeId]); | ^^^^^ Could not preserve
existing manual memoization 114 | 115 | // Default to the first available assignment
once data has loaded. 116 |   useEffect(() => { react-hooks/preserve-manual-
memoization 93:17 warning Error: Cannot call impure function during render

```

`Date.now` is an impure function. Calling an impure function can produce unstable results that update unpredictably when the component happens to re-render.

(<https://react.dev/reference/rules/components-and-hooks-must-be-pure#components-and-hooks-must-be-idempotent>).

```

/home/runner/work/shift_quality_happens/shift_quality_happens/frontend/src/pages/shift-swaps/
ShiftSwapFormPage.tsx:93:17 91 | // can already exist for it. Employees see only their own
assignments. 92 | const myAssignments = useMemo(() => {

```

```

93 |   const now = Date.now(); |           ^^^^^^^^^^^ Cannot call impure function 94 |
return assignments.filter((a) => { 95 |   if ( 96 |   isEmployee &&
react-hooks/purity 118:7 warning Error: Calling setState synchronously within an
effect can trigger cascading renders

```

Effects are intended to synchronize state between React and external systems such as manually updating the DOM, state management libraries, or other platform APIs. In general, the body of an effect should do one or both of the following:

- Update external systems with the latest state from React.
- Subscribe for updates from some external system, calling `setState` in a callback function when external state changes.

Calling `setState` synchronously within an effect body causes cascading renders that can hurt performance, and is not recommended. (<https://react.dev/learn/you-might-not-need-an-effect>).

```

/home/runner/work/shift_quality_happens/shift_quality_happens/frontend/src/pages/shift-swaps/
ShiftSwapFormPage.tsx:118:7 116 |   useEffect(() => { 117 |   if (assignmentId === 0 &&
myAssignments.length > 0) {

```

```

118 |   setAssignmentId(myAssignments[0].shiftAssignmentId); |
^^^^^^^^^^^^^^^^^^^^^^ Avoid calling setState() directly within an effect 119 |   } 120 | },
[assignmentId, myAssignments]); 121 |
react-hooks/set-state-in-effect
